<b>Author:</b>	Amarjit Kaur, Head of Patient Experience and Involvement, BHT Rachael Corser, Chief Nursing Officer, BOB ICB	<b>Exec Lead/ Senior Responsible Officer:</b>	Rachael Corser, Chief Nursing Officer, BOB ICB

### Executive Summary

Carers can play a vital role in supporting patients and know the needs of that person best.

There is a growing body of research that has suggested a correlation between greater carer involvement and improved nutrition and reduced falls for patients in hospital. There is also a recognition that carers play a vital role in improving patient outcomes, reducing length of stay in hospital and reducing the financial burden the NHS. Carers should be supported to be involved in care giving, making decisions and care planning with the agreement of the patient and the carer. Carers have a right under the Health and Care Act 2022 to be involved in decisions about discharge.

The BHT Carer Passport allows carers to agree with colleagues about what care they want to assist with. Launched in Carers Week in June 2024 all inpatient areas at the trust were provided with carer lanyards and badges. The carer passport Standard Operating Procedure (SOP) and accompanying materials, the carer agreement and carer leaflet are available to be downloaded by colleagues from the Trusts intranet site. This story was shared at the BHT Trust Board in July 2024 public meeting.

The work that BHT have undertaken will be used to help the ICB develop a Carers Strategy as part of our commitment to embracing the work of carers do to help with personalised care and codesigning the services we commission. It is anticipated that by 2035 there will be 11% more carers supporting more complex health needs. The 10 year plan is expected to place greater recognition on the role of carers and the NHS constitution is being updated to reinforce the importance of carers.

Thank you to Annabelle, Colin and Pamela for sharing their story with us today.
